

The Trump Administration continues to attack immigrants, refugees, and families by separating loved ones, taking away health insurance from millions and attacking nutrition and housing for working families. Make your voice heard and share your story!

I express my strong opposition to the proposed changes regarding the public charge determination. This proposal will discourage low-income immigrant communities from accessing a wide array of critical government programs related to health coverage, anti-hunger and anti-poverty benefits, and many other essential services. Forcing these families to choose between their health and protecting their immigration status is completely unjust and inhumane. The implementation of this proposed rule will inevitably drive up poverty, hunger, unmet health care needs, and worsen a range of other problems facing many low-income communities of color across the United States. Therefore, I strongly urge DHS to withdraw its current proposal of the public charge determination.
